EDUCATION

ITM University

Bachelor of Engineering in Artificial Intelligence and Machine Learning

Gwalior, Madhya Pradesh

Aug. 2023 – Jul. 2027

TECHNICAL SKILLS

Languages: JavaScript, Python, Java, C, SQL

Frontend: React.js, Redux Toolkit, Context API, Tailwind CSS, Material-UI

Backend: Node.js, Express.js, REST APIs, JWT Authentication, RBAC

Databases: MongoDB, Redis, Elasticsearch

Tools: Git, GitHub, Docker, Postman, VS Code, Firebase, Cloudinary, Razorpay

EXPERIENCE

Full Stack Developer Intern

Jun. 2025 – Present

STARK-IT Solutions Pvt Ltd

Remote

- Engineered a dynamic React layout engine with MongoDB schema storage, reducing homepage customization time for admins by 40%.
- Collaborated in agile development environments to debug, test, and deploy production-ready features.

Freelance MERN Stack Developer

2023 – 2024

ACT, Highchem, Smazzkart

Remote

- Delivered 3 scalable MERN stack applications, admin dashboards, and business platforms for startups across e-commerce and service domains.
- Designed secure REST APIs, JWT authentication systems, and optimized backend workflows, improving application performance and deployment efficiency.

PROJECTS

Starkk.shop – Scalable MERN E-Commerce Platform | *MERN, Redis, Elasticsearch, Razorpay*

- Engineered a production-level e-commerce platform with authentication, cart, wishlist, order management, and secure payment workflows.
- Architected live UI synchronization across user screens using centralized caching and dynamic state management, reducing homepage update latency to under 200ms.

DragFlow – Drag & Drop UI Framework | *passport, zustand, DND kit*

- Built a drag-and-drop UI builder NPM CLI tool supporting dynamic component rendering and real-time layout customization.
- Implemented reusable component architecture with backend-controlled templates and JSON-driven rendering workflows.

gestureBot – AI Gesture Controlled Robot | *OpenCV, MediaPipe, ESP32*

- Developed a real-time AI gesture recognition system for robotic movement control using computer vision.
- Optimized the ML pipeline frame-rate to 60 FPS, ensuring smooth edge computing performance in low-power hardware.

ACHIEVEMENTS & CERTIFICATIONS

Leadership: Co-organized AI Odyssey, a 36-hour AI hackathon at ITM University with 200+ participants, managing technical operations and logistics.

Competition: Secured Runner-Up position at PUCode Hackathon by developing a full-stack event management platform within 48 hours.

Certifications: AWS Certified in Artificial Intelligence and Machine Learning (AI/ML): [Link](#)
AWS certified in Internet of things (Iot) Microcontrollers: [Link](#)
